

## Day 2: Final Project

### Questions for today:

What Education groups have bought in average most fish products?

What Education groups have bought in average most meat products?

What Education groups makes up for most fish product sales in total?

What Education groups makes up for most meat product sales in total?

1. Open the attached Power BI .pbix file or use your own Power BI file (just make sure to use the same settings as we did in the course)
2. Clean the data so that you can answer the questions above. Use the following tools / steps:
  - Connect the file to Power BI
  - Remove Top Rows
  - First row as a header
  - Changing column names (if needed)
  - Removing invalid rows (if needed)
  - Setting up the data types
  - Create a data model
3. Visualize the data so that the answer can be presented with the little report.

Hope you will enjoy the exercise! 😊

Cheers,

Nikolai
